

Vertu manufacture mobile phones of the highest quality. Unrivalled design, pioneering technology, and high end luxury materials, all combine to form a Vertu mobile phone. Handmade in the county of Hampshire.

With this to live up to, Little Duffy were asked to design and supply the new restaurant for their highly valued staff. No mean feat!!! Throughout the design and manufacture process, we worked closely with the client to interpret their vision and deliver an environment that was becoming of such a company and its product.

Clean, cutting edge, bespoke, were a few of the words used to describe the desired finished product. At the same time the outlet had to be functional and hardwearing for the catering operators. The client asked for a theatre cooking section that was unobtrusive yet functional. A separate branded coffee bar was to be installed and should have profiles in keeping with the company's corporate image, the Vertu "V". Delivered on time and on budget, we are very proud of this project.

*Little Duffy worked with the clients architects to design and deliver a staff restaurant that is as cutting edge and stylish as the products manufactured by Vertu.*

*Our directors were adamant that the design should reflect the corporate branding that carries throughout the rest of the building.*

*They achieved this bringing their experience to bear in delivering a quality product for us.*
